Pursuant to a new law (SB 88) and implementing regulations, those claiming the right to divert more than 10 acre-feet of water per year must measure and report the timing, rate and volume of their water diversions to the State Water Resources Control Board. To facilitate landowners' compliance with the new requirements in the unique circumstances of the Marsh, the Suisun Resource Conservation District (SRCD) has agreed to develop and administer an Alternative Compliance Plan (ACP or Plan). In order to be covered under the ACP, each water right claimant within the Marsh must opt in (by filling out and submitting this form) and must agree to abide by the terms of the Plan. Chapter 2.8, Division 3 of Title 23, Section 935 Alternative Compliance for a Measuring Device or Measurement Method Requirement.
